

# PREP YOUR SESSION

Congratulations! You've booked your first session with [Geekskwaad Productions](#)! I am so excited to be working with you and I cannot wait to make your musical visions come to life. However, to ensure that you have the optimal customer experience, there are a few things that I will need from you prior to your session. They are:

## Recording:

- Please create a folder that contains your 2-track beat or track out beat stems so that they may be loaded into your session prior to arrival. \*Format must be WAV. files\*
- Please provide a list of two snacks you would like, as well as one drink of your choice (alcohol will not be provided).
- Please provide details of each song that you will be recording (vibe, intention, mood, message, etc.). \*This helps me get a feel of what you are trying to achieve within our session time. \*
- If possible, please provide BPM and key of your song. This ensures that your song will be formatted in time and in its correct pitch.

\*If you are to bring guests, please limit to two. Space is limited\*

## Mixing:

- Please create a folder that contains your 2-track beat or track out beat stems, as well as your vocal tracks (separately) so that they may be loaded into your session. \*DO NOT SEND YOUR SONG WITH THE BEAT AND VOCAL ON ONE TRACK! A TRACK WILL NOT BE ACCEPTED IN THIS FORMAT\*. \*Format must be mp3 or WAV. files\*

- Please ensure that each track is labeled prior to sending (i.e.: drum, kick, main vocal, background vocal, etc....).
- Please do not send your vocal tracks with any effects on them. Dry vocals ensure that you will achieve the best quality mix.
- Please provide details of each song that I will be mixing (vibe, intention, mood, message, etc.). \*This helps me get a feel of what you are trying to achieve within our session time. \*
- If possible, please provide BPM and key of your song. This ensures that your song will be mixed in time and in its correct pitch.
- Please provide reference track (i.e., a song that is already out that is similar to the sound that you are hoping to achieve). Also, send a rough reference track of your song so that I may understand the premise and structure of the song.
- Please make sure that your recordings are in good quality. Recordings that tend to have a lot of background noise or distortion can really have a negative effect on your mix.

\*Delivery time is 3-4 days\*

And that's it! I know that all of that was a lot to read, but I want to make sure that I set us both up for success so that we may create a powerful masterpiece together.

To send your files, please upload them to [wetransfer.com](https://wetransfer.com) and send them to [geekskwaadproductions@gmail.com](mailto:geekskwaadproductions@gmail.com).
